SAMMYS®

# SPEEDY CLAMP

## CHANGING THE BEAM CLAMP GAME

PROUDLY ASSEMBLED IN THE USA

Sammys® Speedy Clamp is engineered to eliminate manual steps, reduce installation time, and support consistently reliable and compliant installations at any distance.

# 4 STEPS ARE 3 TOO MANY

## *STOP INSTALLING THE HARD WAY*

Manual **four-step** beam clamp installs take time and increase risk of user error. Limited attachment point access due to existing obstructions often leads to workarounds that compromise safety and compliance.

**Manual Install:** **FOUR STEPS**

**Speedy Clamp:** **ONE STEP**

*THERE'S A BETTER WAY.*

## *ONE POWER-TOOL-DRIVEN STEP.*

*ZERO GUESSWORK. CONSISTENT, OPTIMAL CLAMPING EVERY TIME– FROM ANY DISTANCE.*

**4X**

Up to 4x faster installs

Our patented tightening technology ensures proper and consistent clamping force.

Improved safety and compliance for installations at any distance, no ladder required.

# DESIGNED FOR VOLUME.
## BUILT FOR HARD-TO-REACH INSTALLS

### HIGH-VOLUME JOBS

For large-scale, repetitive installs where every second counts.

**Faster Installs:** Reduces labor across high-volume projects.

**Consistent Results:** Delivers consistent clamping force across all installer experience levels.

**Reduced Fatigue:** Eliminates the repetitive pain of manual wrenching all day long.

*(Data Centers, warehouses, manufacturing)*

### RETROFIT & REMODEL SPECIALISTS

For overhead obstructions and hard-to-reach installation points.

**Reduced Risk:** Eliminates ladders and dangerous workarounds when attachment points are inaccessible.

**No Ladder Required:** Saves significant time by eliminating continuous climbing throughout the day.

**Compliant Installs:** Ensures the jam nut is properly tightened and the threaded rod is installed correctly without improper workarounds.

# NO ACCESS? NO PROBLEM.

## REALIZE SPEED AND SAFETY BENEFITS FROM ANY DISTANCE

With our extension installation kit, beam clamp installation from a distance has never been easier in retrofit and service environments.

Use with a standard 1/4” impact driver.
